

Honors Geometry

Chapter 1 Study Guide

Things to study:

- undefined terms in geometry
- be able to define: postulate, theorem, angle, ray, opposite rays, acute, obtuse \angle , right \angle , straight angles, angle bisector, segment bisector, midpoint, congruent, adjacent \angle 's, vertex, collinear, coplanar
- know how to use a protractor to measure an angle, p.20 CE 17-22
- p.8 13-18
- p. 16 33-36
- p. 22 29-34
- Solve for $m\angle 1$ if $m\angle 2 = 3x - 20$ and $m\angle 3 = 2x + 10$

- p. 30 16
- p. 29 Self-Test 2 # 4
